

**Your Paper's Title Starts Here: Please Center**  
**Use Arial 14 Bold**

F. Surname<sup>1</sup>, S. Surname<sup>2</sup> and T. Surname<sup>3</sup> (**use Arial 14**)

<sup>1</sup> Full Address of First Author, Single Line Spacing, Single Line Spacing, Single Line Spacing  
Single Line Spacing, Country (**use Arial 11**)

**E-Mail:** write your e-mail

<sup>2</sup> Full Address of Second Author, Single Line Spacing, Single Line Spacing, Single Line Spacing  
Single Line Spacing, Country

E-Mail: write your e-mail

<sup>3</sup> Full Address of Third Author, Single Line Spacing, Single Line Spacing, Single Line Spacing  
Single Line Spacing, Country

E-Mail: write your e-mail

**Keywords:** List the keywords covered in your paper. These keywords will also be used by the publisher to produce a keyword index. (**use Arial 11**)

**Abstract.** Starting from this section, please use **Times New Roman 12**. This document explains and demonstrates how to prepare your camera-ready manuscript for the conference proceeding. The best is to read these instructions and follow the outline of this text. The text area for your manuscript must be 17 cm wide and 25 cm high (6.7 and 9.8 inches, resp.). Do not place any text outside this area. Use good quality, white paper of approximately 21 x 29.7 cm or 8 x 11 inches. Your manuscript will be reduced by approximately 20% by the publisher. Please keep this in mind when designing your figures and tables etc.

### **Introduction**

All manuscripts must be in English. Please keep a second copy of your manuscript in your office (just in case anything gets lost in the mail). When receiving the manuscript, we assume that the corresponding authors grant us the copyright to use the manuscript for the conference proceedings. Should authors use tables or figures from other Publications, they must ask the corresponding publishers to grant them the right to publish this material in their paper.

All manuscripts must be in English. Please keep a second copy of your manuscript in your office (just in case anything gets lost in the mail). **Please send your paper to the conference via e-mail on the conference web site (send two copies one Word Document and the other as a PDF file)**. When receiving the manuscript, we assume that the corresponding authors grant us the copyright to use the manuscript for conference proceedings. Should authors use tables or figures from other Publications, they must ask the corresponding publishers to grant them the right to publish this material in their paper.

Use *italic* for emphasizing a word or phrase. Do not use boldface typing or capital letters except for section headings (cf. remarks on section headings, below). Use a laser printer, not a matrix dot printer.

### **Organization of the Text**

**Section Headings.** The section headings are in boldface capital and lowercase letters. Second level headings are typed as part of the succeeding paragraph (like the subsection heading of this paragraph).

The section headings are in boldface capital and lowercase letters. Second level headings are typed as part of the succeeding paragraph (like the subsection heading of the previous paragraph). The section headings are in boldface capital and lowercase letters. Second level headings are typed as part of the succeeding paragraph (like the subsection heading of the previous paragraph).

**Second Level Headings.** Second level headings are typed as part of the succeeding paragraph (like the subsection heading of this paragraph). Second level headings are typed as part of the succeeding paragraph (like the subsection heading of this paragraph). Second level headings are typed as part of the succeeding paragraph (like the subsection heading of this paragraph).

Second level headings are typed as part of the succeeding paragraph (like the subsection heading of the previous paragraph). Second level headings are typed as part of the succeeding paragraph (like the subsection heading of the previous paragraph). Second level headings are typed as part of the succeeding paragraph (like the subsection heading of the previous paragraph).

**Page Numbers.** Do *not* print page numbers.

**Footnotes.** Footnotes should be single spaced and separated from the text. Ideally, footnotes appear on the page of their reference, and are placed at the foot of the text, separated from the text by a horizontal line.

**Tables.** Tables (refer with: Table 1, Table 2, ...) should be presented as part of the text, but in such a way as to avoid confusion with the text. A descriptive title should be placed above each table. The caption should be self-contained and placed *below or beside* the table. Units in tables should be given in square brackets [meV]. If square brackets are not available, use curly {meV} or standard brackets (meV).

**Figures.** Figures (refer with: Fig. 1, Fig. 2, ...) also should be presented as part of the text, leaving enough space so that the caption will not be confused with the text. The caption should be self-contained and placed *below or beside* the figure. Generally, only original drawings or photographic reproductions are acceptable. Only very good photocopies are acceptable. Utmost care must be taken to *insert the figures in correct alignment with the text*. Half-tone pictures should be in the form of glossy prints. If possible, please include your figures as graphic images in the electronic version. If TTP is required to scan and insert images, please keep the following points in mind:

(a) the allotted space (for inserting illustrations) must exactly match the space made available in the camera-ready version, so that the electronic version is identical to the hard copy with regard to page and line breaks.

(b) the required positioning of any high-quality separate illustration must be clearly indicated on its reverse side. The size of the illustrations must exactly match the space left in the camera-ready manuscript.

**Equations.** Equations (refer with: Eq. (1), Eq. (2), ...) should be indented 6.35 mm (18 pt or 0.25"). There should be one line of space above the equation and one line of space below it before the text continues. The equations have to be numbered sequentially, and the number put in parentheses at the right-hand edge of the text. Equations should be punctuated as if they were an ordinary part of the text. Punctuation appears after the equation but before the equation number. For example, we may have an equation

$$c^2 = a^2 + b^2, \tag{1}$$

where  $c$  is the first variable,  $a$  is the second variable, and  $b$  is the third variable.

Punctuation appears after the equation but before the equation number. Punctuation appears after the equation but before the equation number. Punctuation appears after the equation but before the equation number. For example,

$$c^2 = a^2 + b^2, \tag{2}$$

where  $c$  is the first variable,  $a$  is the second variable, and  $b$  is the third variable.

Equations (refer with: Eq. (1), Eq. (2), ...) should be indented 6.35 mm (18 pt or 0.25"). There should be one line of space above the equation and one line of space below it before the text continues. The equations have to be numbered sequentially, and the number put in parentheses at the

right-hand edge of the text. Equations should be punctuated as if they were an ordinary part of the text. Punctuation appears after the equation but before the equation number.

## References

References are cited in the text just by square brackets [1]. Two or more references at a time may be put in one set of brackets [3,4]. The references are to be numbered in the order in which they are cited in the text and are to be listed at the end of the contribution under a heading *References*, see our example below.

## Summary

Please provide your phone number, fax number and e-mail address for rapid communication with us (will not be published). Please send your final soft copy through the conference e-mail or the conference web-site. If you follow the foregoing, your paper will conform to the requirements and facilitate a problem-free publication process.
